

## ENTRANCE WALL

Approach: Park as for Star Chek and follow the regular approach trail. This wall is on the right side of the corridor.

Stu Smith descriptions:

**Doodle in the talus 5.10 gear.** Obvious corner capped by a roof. Broken rock leads to a OW section the perfect hands over the lip and a mantel to get to the anchor. Currently just bolts.

**Counting Sheeple 5.12 sport.** The blocky overhang some cool movement throughout on this one I thought. Couple hollow sounding edges but they are crowbar solid. Same start as the corner but campus right on jugs to face, either stick clip first bolt or if you have proper genetics lean out and clip it from the start.
