

MOUNT HABRICH

118

Descent options:

Pitch 7 5.7 15m gear

Move the belay up to a pruned tree. Climb a crack up then angling left to the summit

Pitch 6 5.7 25m 6 bolts & gear

Step right then face climb up: a brief layback leads to slabs and a blocky finish.

Pitch 5 5.8 28m 2 bolts & gear

Immaculate rock. Follow grooves up, then trending slightly left to a bulge finish.

Pitch 4 5.4 25m 2 bolts

Walk up heather slopes. Make a short traverse left past 2 bolts to the belay.

Pitch 3 5.6 20m 3 bolts & gear

Step left into a chimney. Then follow easy slabs to the belay. Links well with Pitch 4.

Pitch 2 5.9 25m gear

Move up a corner then traverse left to a short hand/fist crack. Go up or step left then up to gain a longer corner. Make a tricky stem move (crux) into the corner then hand jam to the top. The final 10m are scruffy but will clean up with some traffic.

Pitch 1 5.4 10m 2 bolts

Step left onto a ramp past 2 bolts.

 Mt. Habrich, Northwest Face
 A moderate alpine climb on superb rock. The route starts from the col NW of Habrich. Currently, the best access (2.5h) is via Shannon Creek and the steep trail up. Better access is planned...
 All stations are fixed (chains). Rappel descent.
 Rack: 1x cams to 3" with extra 1" & 2". Nuts. Single 60m rope.
